

Handcraft

How to make a kite!

What you need:

Two straws

A piece of rope

Paper

Imagination!

- First bind the straws together so they form a cross.
- Make sure the cross is symmetrical
- Attach the cross to the paper and make it hold the cross properly
- Now make a very small hole at the point where the two straws combine
- Here you put a piece of rope through which will help you fly your kite
- Wait until it's windy and fly your kite!

This is a very cheap and easy way to make a kite
